

Department of Computer Applications

24MCE11 - Design Thinking

Worksheet

HMW Activity

Academic Year : 2025-26

Batch : 2025-27

SEM : II (Even)

Year : I MCA A&B

Date : 10.04.2026

Rollno & Name : 25MCR019 - DANUSHREE V S

1. Dress Code Compliance

Problem:

Many students do not follow the prescribed dress code.

Part A – Complete the HMW Statement

1. How might we encourage (action) students to follow (desired outcome) regarding dress code?
2. How might we create awareness for students to improve discipline?

Part B – Rewrite the Following

Rewrite into a strong HMW statement:

1. How might we control dress code?

How might we motivate students to follow the prescribed dress code consistently?

2. Late Assignment Submission

Problem:

Students frequently submit assignments after deadlines.

Part A – Complete

1. How might we implement submission reminders for students to improve punctuality?
2. How might we support students to submit assignments on time?

Part B – Rewrite

1. How might we stop late submissions?

How might we encourage timely submissions through better planning and reminders?

3. Mobile Phone Usage in Class

Problem:

Students use mobile phones during lectures.

Part A – Complete

1. How might we reduce mobile usage among students to improve concentration?
2. How might we encourage students to stay attentive during lectures?

Part B – Rewrite

1. How might we ban mobiles?

How might we promote responsible mobile usage during class hours?

4. College Rule Awareness

Problem:

Students are unaware of institutional rules.

Part A – Complete

1. How might we communicate rules to students to improve awareness?
2. How might we make rules easily accessible for students?

Part B – Rewrite

1. How might we make students follow rules?

How might we effectively inform students about institutional rules?

5. Lab Equipment Misuse

Problem:

Lab equipment is sometimes mishandled.

Part A – Complete

1. How might we educate students about proper usage to prevent damage?
2. How might we monitor lab activities to reduce misuse?

Part B – Rewrite

1. How might we stop lab misuse?

How might we promote responsible handling of lab equipment?

6. Library Underutilization

Problem:

Students rarely use the library resources.

Part A – Complete

1. How might we encourage students to use library resources to improve learning?
2. How might we create incentives for students to increase library usage?

Part B – Rewrite

1. How might we improve the library?

How might we enhance student engagement with library facilities?

7. Attendance Shortage

Problem:

Many students have low attendance.

Part A – Complete

1. How might we motivate students to maintain attendance to achieve academic success?
2. How might we provide support to students to improve attendance?

Part B – Rewrite

1. How might we increase attendance?

How might we encourage regular attendance among students?

8. Campus Cleanliness

Problem:

Students litter on campus.

Part A – Complete

1. How might we promote cleanliness among students to improve campus hygiene?
2. How might we design awareness to reduce littering?

Part B – Rewrite

1. How might we stop littering?

How might we encourage students to maintain a clean campus?

9. Canteen Waiting Time

Problem:

Students face long queues in the canteen.

Part A – Complete

1. How might we streamline ordering for students to reduce waiting time?
2. How might we implement digital systems to improve service speed?

Part B – Rewrite

1. How might we fix canteen problems?

How might we improve canteen efficiency to reduce queues?

10. Lift Usage Problem

Part A – Complete the HMW Statement

Fill in the blanks using **action** + **target user** + **desired outcome**.

1. How might we guide students to use the lift properly to ensure .?
2. How might we implement rules for lift users to prevent overcrowding?
3. How might we encourage students to follow guidelines to improve safety?
4. How might we design awareness for students to reduce misuse?

Part B – Rewrite the Following (Make It Strong HMW)

Rewrite into a strong and structured HMW statement.

1. How might we stop lift misuse?

How might we promote proper lift usage among students?

2. How might we control students in the lift?

How might we ensure disciplined behavior inside lifts?

3. How might we avoid lift damage?

How might we prevent lift damage through better awareness?
